

Microsoft Convergence 2008

25th October 2008

EFS Technology A/S participated in Convergence 2008 Copenhagen from the 23rd to the 25th of October 2008

Convergence is the premier Microsoft Dynamics event, bringing customers, partners, team members and industry experts together in an environment created for you to discuss solutions, address business needs and establish a true community that can be leveraged throughout the year.

At Convergence EFS Technology demonstrated how combining Microsoft Business Solutions Dynamics AX and Dynamics NAV with AutoFORM LaserNet helps improve business efficiency.

LaserNet Output Management facilitates the distribution of business documents between companies in the preferred format and to the correct destination. In other words, a LaserNet solution delivers precise business communication every time information is processed from the ERP system.

AutoFORM PDM integrates with Microsoft Dynamics allowing invoice images to be viewed online, allowing faster more cost effective, processing and approval. In addition by offering financial and non-financial manager's immediate, but controlled desktop access to invoice images, they can more readily check expenditure and produce management reports, ultimately improving financial control across the business.
