

An AutoFORM Investment Saves Money – and the Environment

21ST March 2009

Save money and protect the environment by investing in a sustainable and market leading output and document management solution: AutoFORM LaserNet

After the G20 summit, the next worldwide event will be the UN's Climate Conference COP 15, hosted this year by Denmark. The Danish Government is renowned for enforcing E-invoicing for all public services, which has already saved the Danish Public Purse approximately €120 million.

If your company is looking for a way to reduce your CO2 emissions investing in, output & document management technology can prove to be very effective. You can actually achieve several things in one go – save money, time and internal resources by automating your internal handling of invoices, credit notes, account statements etc. – and save the environment.

According to Gartner, it is the source of 2% of the world's collective CO2 emission– yet at the same time, ground-breaking IT solutions can pave the way for a drastic reduction of the remaining 98%. For every 10,000 documents delivered electronically, a company could save approximately £50,000 in printing, postage and filing costs, and what is more at least one tree and 10 tonnes in CO2 emissions.

With AutoFORM LaserNet your company can save on:

- ¾ Paper, envelope, printing consumables, postage and handling costs when sending paper business documents to customers and business partners - typically 1-2 Euros per document.
- ¾ A multitude of document handling, filing, copying and retrieving costs by electronically archiving documents using AutoFORM PDM IDOM (COLD) archiving and Scanning Workflow solutions.
- ¾ E-invoicing solutions: According to the European Commission, businesses across Europe can save up to €18 billion by using an e-invoicing solution. The Aberdeen report from May 2007 quotes a reduction of processing costs of 74 - 89%. Whether you are looking to cut costs quickly or sustain your business for future growth, AutoFORM LaserNet can help business integrate e-invoicing XML solutions into their existing ERP and Finance applications.

According to our customers, the investment in AutoFORM LaserNet can be paid back in less than 3 months.
